

RE-ACCREDITATION MASTERPROGRAMME IN ENVIRONMENT & RESOURCE MANAGEMENT

To guarantee the quality of the programmes at VU University Amsterdam, the programmes are assessed once every six years by a panel of external experts. The final assessment of the programme is conducted by the Dutch Flemish Accreditation Organization (NVAO).

The masterprogramme in Environment & Resource Management was reviewed in 2018 and the final assessment is positive. Amongst other things, the panel advised that key concepts can be drawn up to define the study programme. In addition, the panel indicated that the programme has a strong pre-master's track and skilled staff.
